Re: Limelight Quarry lease, Rose Bud, Utah and violation notice written by Lynn Kunzler on 5.24.05

Greetings,

I was really quite shocked when I received this notice since it was the first meeting in 2005 and I frankly was unaware that our operation was not much different than last year. I think that you will agree that our operation is the cleanest and most professional decorative stone quarries in Utah. We work very hard at our business to maintain that position.

In view of the over-all logistics and economic realities in today's quarrying environment, we have decided to down size our Limelight Quarry operation in terms of physical area and personnel that we employ. Beginning the week of June 6 we will lay out the boundaries of the quarry and after meeting with you end of that week or the first of next week and begin restoration work to be completed in 30 days or less. After you see the results of this work and how fast it can be accomplished I hope that you will consider a reduction in our bond amount.

I am looking forward to working with the division of Oil, Gas and Mining with an understanding of mutual cooperation and benefits.

Sincerely,

Gary Mullard
President
